Salan, fights now not as a conquerer, but as a refeated

> Every man is in one singeom or the other, Every set of forces takes character as it is a united against Christ, so the exhortation is tractile kingcom of Carist be united against

> The speaker then created at considerable length of the unity of Christ's kingdom, consiccrec as to its composition, and its rela-

First—Carist's proverb is this: All who are his work. There is an annihi ation of neutrality. It is the death-knel to all standing The first term of the Corona institute undecided. There is no such thing as letting

There is a small third party in those who who give for the gospe and for the support of Caristian institutions, but who cany the safe seeing and for crunkenness. and the most cangerous part. The carna mine is enmity against Goe. We are a by nature in nostility to Carist. You need not place yourse? You are a reacy places. The text su object Carist to have appeared wit i testimony to a , the nations of the work. The separation has taken hace. As in chemsolvent of the two elements of good and back is work is to disintegrate, to separate from the work. Come ye out from among them. and be ye're parate. As Satan's king' om is a unit, so is mine. You cannot be n both Paul ears on Christians to unify. Two practical questions are suggested. Lave you dec area for Carist, yie dec to aim, taken him as a pattern to obey? Lave you Chr sys: pir .? It so you are with Caris. A others are against Him. The natural hostility remains. There be against Cirist? To have, maintain and its. aggravate resistance to trut i. You must not only yield, but you must work in the spirit of Christ, or you are not a Christian. Labor for Carist is not in the outward, i.e., but in the inward spirit.

Second-Ciris, sees the expression; no: on y the neart principle out the expression. Carist has bound the strong man Setan, and Caristians should enter upon the work of spoliation. The goods of Satan to be spoiled d verse and it tierto so ated e ements. A . the most of lous and crockety person pressures engaged in this work are scatterers. ent at l'aver y's Fourteent i-Street theater Satan is bounc, contrary to a general opinion, and not loose. You must either have this

ing to Cirist, but of gathering with him. If the three or four weeks, and when ready w vou are not gathering in Christ's spirit, you be occupied as a boarding house by a Mr because I am not for him? The unity of

The Sewerage Question

To the Editor of the Gazette:

tice an article on sewerage by J. J. Lin the neatly fitter, up and affords the firm a better p tenor of which is so much at variance with opportunity divisplaying their goods, as they read, as the ser pourelesson ast Sunday mornithe facts of the case that a reply seems necesingly have two stories wherein to store and ing the irste upter of I Cor nth ans, and took sary! The reasons given in that article in this pay their argo stock. as its text part of the 30th verse of the favor of the dession, are precisely the ones that make it objectionable and cangerous. As a well known, sewerage is purified by oxidization and in no other way. Twenty feet uncer ground this is impossible, and cecomposition takes a ace, generating posonous gases. During the heated term tiese gases are to some extent prought to the surface and sickness is sure to follow. As the city in- , any 19th will be conqueted by President creases in size, ground, now given lover to the s certain that the firsh occupants we suffer Easter yeard on March 19th by Rev. Tutail . sickness I not deat's from this cause.

The system of sewers now in use in the east, called the couble system, provides for a maximum rainfa i of one inch an hour; wit a our severe storms one-hat inch wou cibe the imit of safety, and this would require a brick sewer six or eight feet in diameter, usefu articles exhibiter. One of the principal John Clements, a mallignaire of Community which is of course impracticable, in the system used in Denver and Memphis, Tenni, called the separate system, the opposite rules hole good; i. e., the pipes should be as small as is practicable. At Denver the sublic sewer is 30 inches in ciameter, caleurated to inpet the vants of a so at ation of 203,009. When a visited it this winter, near the out-

let at 19.30 a.m. there was a flow of just 6. nches. An 18-inch sewer at the sout a part of the city will be ample to meet the wants of a popuration of 30,000. Instead of funstreets, with an expensive system of Laterals, rwould rue a 3-incu pise up each alley, from the public sewer, as far north as the property. owners desire. At Xemphis a 6-inch pipe tic on a grace of 3 inches per 100 Jeet has a capacity of discharging 130 galous per minute, and Crains 336 touses. Our natural fall here is from 40 to 50 feet bor mile. A 9-inch pipe aid on that grace would discharge about 675 galous per minute, or over five times as much, and creable of craining with safety 2,000 iouses. If we have the public sewer at Cucharas street, and run a lipe up the boys in every manner possible. The cut is paper, to be the subject, see Sa a ey between Cascace avenue and Mejonstreet as far as the college resortation, sond comfort, but it should, acceptables, the part to the Poor was amount of a coll we shall get 11 blocks containing 15 25; it? If would be well to give this matter (i.e. he than the le would proved in the cofeet ofs, and, if each is built on, giving 476 nouses, the margin is very arge, time when the fire boys are most needed, they Frank Congress has been asset to the and smaller of second conductive sizes, and will fail to respond. Who conductions of precision, were now experience slows that in the long run the "them?" nine-ine (bije is as cheab as the six-ine), as the cost of laying one is as much as the other. and but sight difference in the cost of the pine. Incertie plan proposed there would need to be milt by the city only about 8,000 feet of public sewer, costing, with manholes, &c., in the neig thorhood of \$15,000. Supposing the property owners between Cascace avenue and Weser street should desire pipes air as far nortras Caene la Pongre street; this would require three alley pipes, each about 5,400 feet ong, or 16,000 feet of nineing a pipe. This won clost, with manholes, flus i tanks, etc., about \$39,000. Chere would be 528 25-feet offs to pay for the same, a cost to each of 857.

If a set of plans and specimentions were submittee to contractors, I think the figures wome run below 850 per lot, or from \$40,000 to 545,000 for the whole plan, public sewer and laterals. Until something of this kind is come not exact figures can be given, though a citizens of Phieblo. thing the above will be found nearly correct. Certain y the cost will not be any such amount it is producing very rich ore. as given by "....."
